

FREE Early Years Webinar

"Working With Parents"

15th June at 19.00

Suitable for senior and teaching staff, the webinar, covers a journey of practice embracing parents. It begins right at the start and covers building trust, settling in, embracing learning and development, how to support challenges ... through to when the child has left.

Throughout, there is information concerning the EYFS requirements. Plus, there are references to research. Everything is included to base best early years practices on, ultimately for the child's benefit.

Catherine Lyon presents the webinar.

Catherine is known for helping people get everything right so the child can fully benefit from their early education.

For 32 years, she ran 'outstanding' and nationally award-winning kindergartens in England alongside her CACHE training centre. She currently continues to develop early years software for kindergartens and consultancy work in different countries.

The child is always at the centre of her practice.

Jan Lake will co-present the webinar translating it for you.

Jan's skills continue to help develop the bilingual version of the award-winning English early years software used in China, known as sparkCHINA.

Jan is passionate about bringing good education opportunities to China. She holds French MBA and she is a qualified English L3 forest school leader. She regularly organises forest school camps and forest school teachers' training in China.
